MADS Values

Our core value for our clients to understand is that we see every door as an asset to their business. We are also guided by the following principles:

- Upholding the highest quality of customer service
- Serving with integrity
- Increasing efficiency through utilising the latest technology
- Maintaining the highest level of standards
- Trust and reliability
- Routine & systematic technical training to all servicing & maintenance staff

Certified Technicians

We are fully certified in the supply, installation, servicing & maintenance of automatic doors through the National Association of Testing Authorities, Australia (NATA) via our affiliation with ADIS Automatic Doors. Our certifications are reviewed and verified through our membership with iPRO LIVE.

Maintenance Contracts

In accordance with Australian Standard AS5007, inspection and maintenance of the equipment is required at intervals not exceeding a time period of 4 months, and is the responsibility of the building owner or agent.

Failure to properly service and maintain powered pedestrian doors may cause an electrical and/or mechanical failure. This could result in a possible personal injury and related liability claim by the aggrieved party against the building's owner and facilities manager.

Regular inspection and maintenance of the automatic door entrance in accordance with AS5007 is important to ensure safe operation, long term reliability and working efficiency of the automatic door entrance, including safety devices and safety systems.
